

Q 1 The frequency distribution of weights (in kg) of 40 persons of a locality is given below

Weight	40-45	45-50	50-55	55-60	60-65
No of persons	4	12	13	6	5

- What is the upper limit of first class interval?
- What is the class size of each class?
- Find the class mark of second class interval.

Q 2 The marks obtained by 20 students of a class in a test out of 10 marks are:

Marks Obtained	No. of Students
0 – 2	2
2 – 4	3
4 – 6	5
6 – 8	4
8 – 10	4
10 – 12	2

- If pass percentage is 40% then how many students failed?
- How many students score more than 80% marks?

Q 3 The following histogram shows the height of 42 students in the class.

From the above histogram answer the following questions:

- How many students are having height less than 155 cm?
- How many students have height equal to 160 or more?
- How many students have height less than 170 cm?

Q 4 The following histogram shows the number of literate females in the age group of 10 to 40 years in a town:

- Find the age group in which number of literate females is the highest
- What is the class width?
- What is the lowest frequency?
- In which age group literate females are the least?

Q 5 The marks scored by 20 students in a test are given below:

54, 42, 68, 56, 62, 71, 78, 51, 72, 53, 44, 58, 47, 64, 41, 57, 89, 53, 84, 57

Complete the following:

Marks in class intervals	Tally marks	Frequency (No. of children)
40 - 50		
50 - 60	 	
60 - 70		
70-80		
80 - 90
