

NAME:

CLASS : 4

DATE :

Match the following sources of energy to the correct description.

Source of energy		Description
Sun	<input type="radio"/>	<input type="radio"/> Produces kinetic energy that move windmill blades
Wind	<input type="radio"/>	<input type="radio"/> Formed from the decay of plants and animals that died thousands of years ago
Battery	<input type="radio"/>	<input type="radio"/> Exists in different shapes and sizes to supply electrical energy
Fossil fuel	<input type="radio"/>	<input type="radio"/> Main source of light for life on Earth
Water	<input type="radio"/>	<input type="radio"/> Produced from nuclear materials to generate electrical energy
Food	<input type="radio"/>	<input type="radio"/> Has potential energy that is used to generate electrical energy
Wave	<input type="radio"/>	<input type="radio"/> Organic matters from plants and animals that release energy when burned
Nuclear	<input type="radio"/>	<input type="radio"/> Gives energy to humans and animals and stored in the form of chemical energy
Biomass	<input type="radio"/>	<input type="radio"/> Contains kinetic energy which can generate electrical energy
