SKILL 3.0: RECOGNISE NUMBERS - Ascending Order

INSTRUCTION: Arrange number from the smallest to the largest number.

Example:

The example shows a circle containing the numbers 2, 4, 1, and 3. To the right of the circle is a staircase of four boxes. The numbers are placed in the boxes in ascending order: 1 in the first box, 2 in the second, 3 in the third, and 4 in the fourth.

A circle contains the numbers 8, 5, 6, and 7. To the right is a blank staircase of four boxes for the student to arrange the numbers in ascending order.

A circle contains the numbers 3, 5, 6, and 4. To the right is a blank staircase of four boxes for the student to arrange the numbers in ascending order.

A circle contains the numbers 10, 8, 9, and 7. To the right is a blank staircase of four boxes for the student to arrange the numbers in ascending order.
