

ESCAPE FROM THE JUNGLE

On Christmas Eve 1971 Juliana Koepke, a seventeen-year-old German girl, _____ Lima by air with her mother. They _____ on their way to Pucallpa, another town in Peru, to spend Christmas with Juliana's father. Forty-five minutes later the plane _____ up in a storm, and Juliana _____ 3.000 metres, strapped in her seat. She was not killed when the seat _____ the ground (perhaps because trees broke her fall), but she lay all night unconscious.

The next morning Juliana _____ for pieces of the plane, and _____ for her mother. Nobody answered, and she _____ nothing except a small plastic bag of sweets.

Juliana's collar bone was broken, one knee was badly hurt and she had deep cuts on her arms and legs. She had no shoes, her glasses were broken (so she couldn't _____ snakes or spiders, for example), and she was wearing only a very short dress, which was badly torn. But she decided to try to _____ out of the jungle, because she _____ that if she stayed there she would die.

So Juliana _____ to walk. She did not _____ anything to eat and as the days went by she got weaker and weaker. She was also in bad trouble from insect bites. She _____ helicopters, but could not see them above the trees, and of course they could not see her. One day she _____ three seats and _____ that they had dead bodies in them, but she did not recognise the people.

After four days she _____ to a river. She saw caimans and piranhas, but she _____ that they do not usually attack people. So Juliana walked and _____ down the river for another five days. At last she _____ to a hut. Nobody was there, but the next afternoon, four men arrived. They _____ her to a doctor in the next village.

Juliana _____ afterwards that there were at least three other people who were not killed in the crash. But she was the only one who _____ out of the jungle. It _____ her 10 days.
