

THE ENVIRONMENT CLUB

The Environment Club of SMK Taman Setia aims to increase awareness of environmental issues among students and teachers. The Club meets every Wednesday from 2.30 p.m. to 3.30 p.m. at the school hall.

At the start of the year, an organising committee was elected. Then, a group of students and the teacher advisor talked about the events they wanted to organise for the first six months of the year.

As a result of the discussion, the first event organised by the Environment Club was held in February. It was a recycling programme. The club organised a talk on recycling, a workshop on reusing and upcycling old items, a field trip to a recycling centre and placed bins in each classroom and in the office.

In the month of March, a climate change education programme was organised with talks and activities on the subject. The speakers were knowledgeable on climate change education. Some of the activities included poster-drawing and essay-writing competitions and a quiz.

Currently, the members of the Environment Club are busy organising an Earth Day Fair. It is the biggest event of the year. The fair is scheduled for Saturday, 25 April. It will be held at the school car park from 10 a.m. to 5 p.m.

Over 20 booths will be set up at the venue. The booths will display information and conduct activities to help educate students on environmental issues. There will be exhibitions, documentary screenings, games and quizzes. Prizes are up for grabs if students win the games or quizzes. They can buy a variety of environment-friendly products too.

Questions 1 – 8

Complete the following table. Choose **no more than three words and/or a number** from the text for each answer. For each question, write your answer in the space provided on your sheet.
