

GHS Tallur

Arithmetic progression

Name of the student:

1. In the A.P. 12, 19, 26, find T_{15}

Solution: $a =$, $d =$ - = , $T_{15} =$

$$T_n = a + (n-1)d$$

$$T_n = +$$

$$T_n = + -$$

$$T_n = +$$

$$T_n = +$$

$$T_n = +$$

$$T_n =$$

2. Find the number of terms in the finite

A.P. 7, 13, 19,, 151.

Solution: $a =$, $d =$,

Let the number of terms be n . so $T_n =$

$$T_n = +$$

$$= +$$

$$= + -$$

$$= +$$

$$=$$

$$n = - =$$

Therefore, $n =$
