

## UNIT 5 MATTER: CHANGES OF STATE

1. Drag the words in the box to complete the text.

liquid	change	mass	Water	states
Ice	Energy	vapour	sound	matter

Everything around us is made of *matter*. It can be in 3 different

*. It can be solid, liquid or gas. Matter can be easily found in the 3 different states. When it is solid it is called ice, and when it is gas it is called vapour. Matter can be in 3 different states.*

What is NOT matter, like *sound or light, is energy. It has no mass nor volume.*

2. Write SOLID, LIQUID or GAS underneath the picture.

--	--	--

## UNIT 5 MATTER: CHANGES OF STATE

3. Choose the right word to explain the change of state in water.

### STATE OF MATTER
