

Resuelve la ecuación cuadrática:

$$2x^2 - 6x + 4 = 0$$

$$x = \frac{-\boxed{} \pm \sqrt{\boxed{}^2 - 4\boxed{}\boxed{}}}{2\boxed{}}$$

$$x = \frac{\boxed{} \pm \sqrt{\boxed{}}}{\boxed{}}$$

$$x = \frac{\boxed{} \pm \boxed{}}{\boxed{}}$$

$$x_1 = \boxed{} \quad x_2 = \boxed{}$$
