

Online Reviews: ★ or ★★★★★?

Professor: So, Dennis, what changes have you seen in marketing recently?

Dennis: Well, as you know, customers love to post online reviews of products these days. These reviews are now just **as important as** traditional advertising. Maybe even more important. TV advertising is **as useful as** it was before, of course. On the other hand, newspaper ads¹ are much **less effective than** they used to be.

Professor: Hmm. That's interesting. . . . I've spoken to some marketing people who **aren't as positive as** you are about online reviews.

Dennis: Really? I'm surprised. There are certainly some concerns with online reviews. For example, satisfied customers are **less likely** to write reviews **than** people who have had a problem. This means there might be more negative reviews than positive ones. But online shoppers are wiser now. A few negative opinions are **not as harmful as** they used to be. Also, the positive reviews can be **as valuable as** ads. If a customer loves a product, he or she will endorse² it just **as enthusiastically³** as a TV ad does!
