A B C D

27. There <u>used</u> to be <u>less</u> unemployed people in <u>this city</u> five years <u>ago</u>.

A B C D

III. WRITING.

Read the text then answer the questions.

Dear guests, I'd like to talk to you today about renewable and non-renewable energy.

Fossil fuels are non-renewable energy sources. They include oil, coal, and natural gas. They can be used to create energy, generate electricity, or drive big machinery. Unfortunately, they are harmful to the environment. Viet Nam still relies mostly on non-renewable energy sources, however, hydro power is increasingly used here too.

Hydro and nuclear power can generate a great deal of energy. They are renewable and plentiful. However, hydro power is limited because dams cannot

LIVEWORKSHEETS

be built in certain areas. Nuclear power can provide enough electricity for the world's needs, but it is dangerous.

The sun and the wind are other alternative sources of energy. The wind turns turbines to make electricity. Solar power can be converted into electricity. It can be used to heat or cool our houses. Although there are some disadvantages, these alternative energy sources can offer abundant amounts of clean, safe electricity. They will be valued more and more in the future in Viet Nam.

Questions:

28. How many types of energy sources are mentioned in the text? What are they?

.....

29. Is solar power used most in Vietnam?

.....

30. What does the professor think Vietnam will use more in the future?

.....

Read the following passage and choose the best answer

Making a film takes a long time and is very hard work. Writing the story for the film may take many weeks. Filming the story, or shooting the film, often takes at least six months. Actors and cameramen work from very early in the morning until late at night. Each scene has to be acted and reacted, filmed and re-filmed, until it is just fine.

Sometimes the same scene has to be acted out many times. The film studio is like a large factory, and the indoor stages are very big indeed. Scenery of all kinds is made in the studio. Churches, houses, and forests are all built of wood and cardboard. Several hundred people work together to make one film. Some of these people are actors and actresses. The director of the film, however, is the most important person in a film studio. He decides how the scenes should be filmed and how the actors should act.

LIVEWORKSHEETS

Most people go to see a film because they know the film stars are in it. Sometimes the film may be very poor. It is best to choose a film made by a good director. Some famous directors make their films very real; people feel that they themselves are among the people in the films.

31. Shooting a film often takes.....

A. less than six months	B. at least six months	C. many weeks	D. from early in the morning until late night
