Web Browsers

The software used to open websites and webpages on the internet is the web browser.
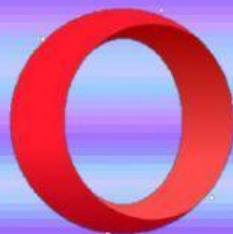

| Google Chrome | Mozilla Firefox | Edge |
| Opera Mini | Internet Explore | Safari |

Use of Web Browsers

To use a web browser, the computer should be connected to the internet.

🙂 Normally a web browser can be opened via a shortcut on the desktop.

Start
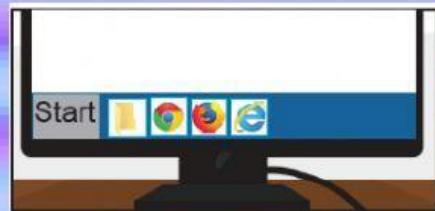

🙂 The address bar can be seen on the top of the web browser's interface.

Address bar

Google ×

← → C 🔒 https://www.google.com
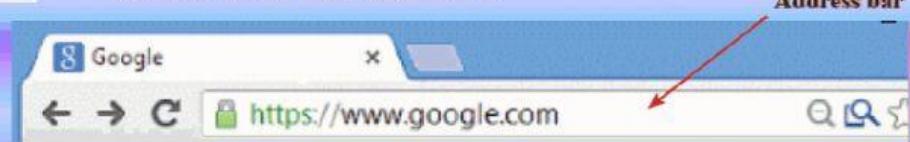

🙂 If you want to open a website, you need to enter an address in the address bar.

Bring the cursor on to the address bar and click on it. Then enter the address directly. Then press the enter key.

Buttons of Web Browsers

⬅ Back

You can return to the web pages that you have already viewed by clicking the button.

You can access the first page of the web browser by clicking the button. The button is shown in the form of a house.

Home

Back

➡

Forward

By clicking the button, you can go back to the web page that you were looking at before you clicked the back button.

History
