

Error Correction – Consumerism and Financial Awareness 1

Darren did not come from a well-to-do family. One day, he (0) **ask** his father is he could have a bicycle to cycle to school. Walking to school took him at least half (1) **a** hour. His father told him (2) **sad** that unfortunately he could not afford to buy a bicycle for him. Darren understood the situation. He thought of ways to (3) **earned** money and buy the bicycle himself. His friend (4) **suggest** that since he was good at mathematics he could give maths tuition to his schoolmates. Darren thought it was a good idea. He advertised (5) **him** services on the school notice board. Soon, he had two students. He taught them in the evenings (6) **during** school at their homes. Darren was a (7) **patiently** tutor. His students had no problem understanding him. They both did very well in their exams. After a few months of (8) **tutor**, Darren had made enough money to buy his bicycle. However, since he enjoyed tutoring, he continued doing it.

Error Correction – Consumerism and Financial Awareness 2

It is good to (0) **started** saving your money as soon as possible. You never know when it may come in handy. However, you should first set specific goals for how much you want to (1) **saving**. For instance, you might set a goal that you will reward yourself (2) **by** a slice of cake every time you save RM 100. If you (3) **is** saving for a specific thing, do not forget to account for the cost of sales tax, which is an extra charge added on to the price of almost anything you buy. You should also keep your money somewhere safe, like a money box in your cupboard. (4) **These** is to avoid your money getting lost (5) **and** stolen. You could also put (6) **its** in a savings account where you can get an interest rate. It is (7) **the** good idea to make a chart so that you can keep track of (8) **which** you have spent. This will keep you motivated to continue saving!
