

# Flow charts

## Grade 07

### Unit 05

## ***What is algorithm?***

Process or set of rules to be followed in calculation or other problem solving operations in the computer.

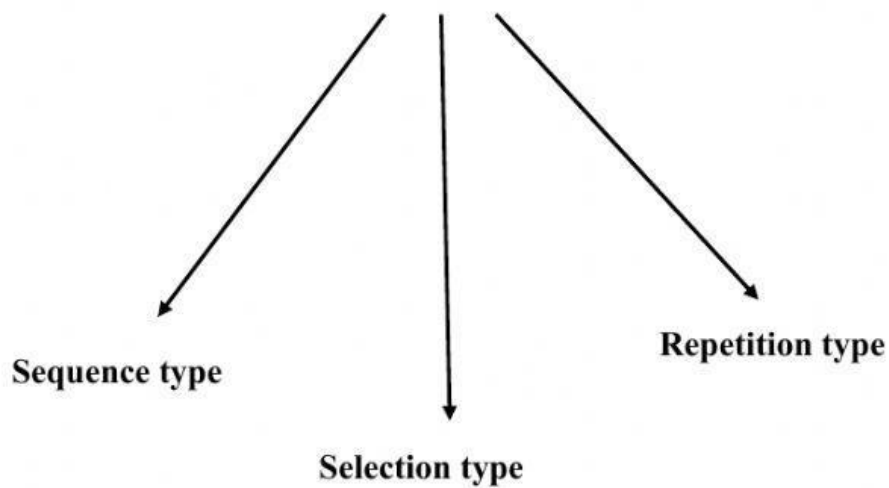

What is Flow Charts?

A graphical representation of a computer program.

### **Flow charts**

If the steps are carried out one after the other from the beginning to the end in a particular consecutive order, it is called a **Sequence**.

Selection decides which steps are executed depending on whether a condition of an algorithm is satisfied or not is called **selection**.

## Sequence Type

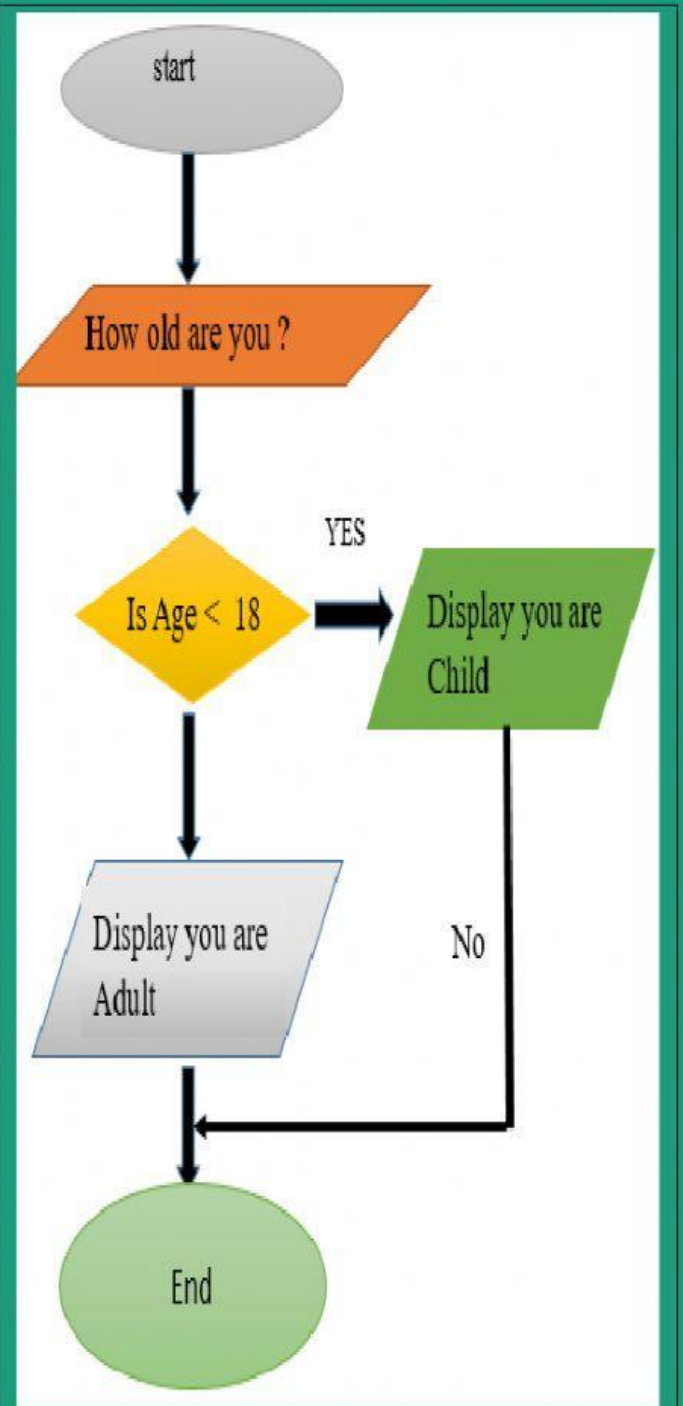

## Selection Type

Let's calculate the price of five pencils

Let's see how old are you?  
Are you a child?  
Are you an adult?

Match the correctly following flow charts symbols

Decision making

Data flow

Process/Action

Input /Output

Start / End

## Solve the below mention problems

Let's find the perimeter of a square pond

$$\text{Perimeter} = \text{Length} \times 4$$

**END**

**Input a length of pond**

**Start**

Going to the playground or the library according to the weather condition.
