

## PEP - Activity – 5.2

### Think and Ink

Complete the Paragraph with the clues given.

Clues :

24 hours      anticlockwise      west      rise      rotation  
Set      east      day      night

The movement of earth on its axis is called \_\_\_\_\_ .It

rotates from the \_\_\_\_\_ towards \_\_\_\_\_ .Earth's

\_\_\_\_\_ turn on its axis make the sun appear to \_\_\_\_\_

in the east and \_\_\_\_\_ in the west. As Earth rotates,different parts

of the earth face the Sun. The part that faces the Sun

experiences\_\_\_\_\_.earth completes one rotation every

\_\_\_\_\_ .
