

## Factors and Multiples (Part I)

Let's find the numbers divisible by **2, 3, 4, 5, 6, 9** and **10**.  
You have learned how to choose the numbers that divisible  
by these values. Use that knowledge and join following  
statements to the correct number.

The number divides only by 3

2541

The number that divides  
only by the 2 and 4

2118

The number that divides  
only by the 2, 3 and 6

164

The number that divides  
only by the 2, 3, 4 and 6

912

The number that divides  
only by the 2, 4, 5 and 10

3348

The number that divides  
only by the 2, 3, 4, 6 and 9

800
