

## UNIT 5: THE ANIMAL WORLD

### TABLE COMPLETION

Hi there, everybody, and welcome to Animal World. Before you start your visit. I'd just like to tell you about a few \_\_\_\_\_ happening here today. They're all free, and I'd really encourage you to go to as many of them as you can, as I think \_\_\_\_\_.

The first event is called \_\_\_\_\_, and it's happening this morning quite soon in the Insect House, which is just \_\_\_\_\_. The well-known entomologist Dr David Crocker, who many of you will have seen on television, is \_\_\_\_\_ all about ants – the different types of ants, \_\_\_\_\_ themselves, what they eat, their behaviour and so on. It's actually a \_\_\_\_\_. So, The World of Ants, a lecture by Dr Crocker, in the Insect House, and it starts at 11 o'clock and \_\_\_\_\_.

\_\_\_\_\_, that's 12 o'clock, there's a film which is just as fascinating and it's called The Great Migration This is \_\_\_\_\_ and how they migrate across continents and oceans using the Sun, the stars and the Earth's **magnetic field**. As I said, it's a film – an absolutely spectacular film – which all the family will enjoy, \_\_\_\_\_ – and it's on in Theatre C, which you can see \_\_\_\_\_ – so bear that in mind for 12 o'clock.

The next event is a demonstration \_\_\_\_\_ and given by Monica Chaddha. It's called Encouraging Garden Wildlife. Monica will be showing you ways of encouraging animals, birds and other wildlife to \_\_\_\_\_, how to place boxes for nests, \_\_\_\_\_ for them and all sorts of practical advice. That's at 2.30, so just after lunch.

The final free event for today is Birds of Prey. Tasha, their keeper, will be giving a display of some of our most **magnificent** birds and how they fly, and I thoroughly \_\_\_\_\_. The display includes **eagles**, **vultures** and **owls** and will be starting at 3.45 on the lawn outside. It's an \_\_\_\_\_, so remember, on the front lawn at 3.45 to see the birds flying.
