4.2   Four more friends will be joining Peet and Roland. They will travel by car and use a trailer to transport their motorcycles. To protect the motorcycles from damage, they need a 20 cm space around all four sides of the motorcycles.
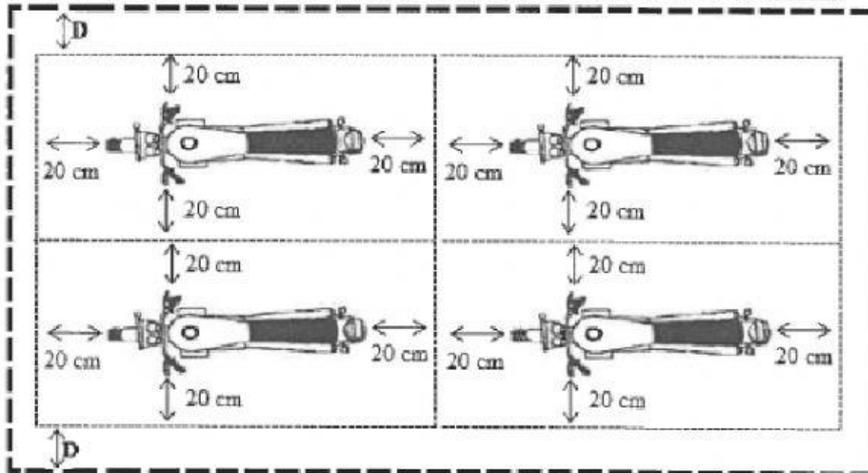

The dimensions of a single motorcycle are given below.

Length (L) = 229 cm, height (H) = 125 cm and width (W) = 86 cm

Below is the layout plan of the four motorcycles placed onto the trailer.

Use the sketches above to answer the questions that follow.

4.2.1   Calculate the minimum length required to safely place two motorcycles, one behind the other, onto the trailer, taking into account the precautionary measures above.   (3)

4.2.2   If the two motorcycles are placed in the centre of the trailer, **D** will be the equal distance on either side of the width of the trailer, as shown in the diagram.

Calculate (in cm) the value of **D**.   (4)

5.2 The graph below shows the estimated total population of South Africa and the annual population growth from 2013 to 2017.

ESTIMATED TOTAL POPULATION AND
ANNUAL GROWTH FROM 2013 TO 2017

[Source: *South Africa – State of Waste Report, First Draft*]

5.2.1 Write down in words, and without the use of numbers, the population of South Africa in 2013. (2)

5.2.2 Determine, rounded to the nearest 10 000, the population increase from 2015 to 2016. (3)

5.2.3 Calculate the annual population growth (APG) for 2015.

Use the following formula:

$$\text{APG} = \frac{\text{current population - previous population}}{\text{previous population}} \times 100\%$$
