IX. Read the following passage and mark the letter A, B, c, or D on your answer sheet to indicate the correct answer to each of the questions.

For many years, people believed that the cleverest animals after man were chimpanzees. Now, however, there is proof that dolphins may be even cleverer than these big apes.

Although dolphins live in the sea, they are not fish. They are mammals. They are in many ways, therefore, like human beings.

Dolphins have a simple language. They are able to talk to one another. It may be possible for man to learn how to talk to dolphins, but this will not be easy because dolphins cannot hear the kind of sounds man can make. If man wants to talk to dolphins, therefore, he will have to make a third language which both he and the dolphins can understand.
