Indica la referencia de cada pronombre señalado.

The statement of financial position shows the financial status of an organization at a particular instant in time. It is essentially a snapshot of the organization at a given date.

The assets are the economic resources of the company. They are, for example, cash, equipment and inventories.

When a company takes out a bank loan, it agrees the terms of repayment.

Because it shows the company's financial status at a particular point in time, a balance sheet always includes a specific date.
