Keeping calm

- It's important to try and keep calm in the exam – getting nervous will make it more difficult for you to understand the listening.
- Try to focus on each question and underline the key words in the questions before you listen.
- As you listen, look at the pictures carefully and take notes. Write down any key information you hear.
- You will have time to read your notes and the questions again, so don't worry if you can't answer all the questions the first time you listen.
