

Parts and wholes

Name:

ROLL NO:

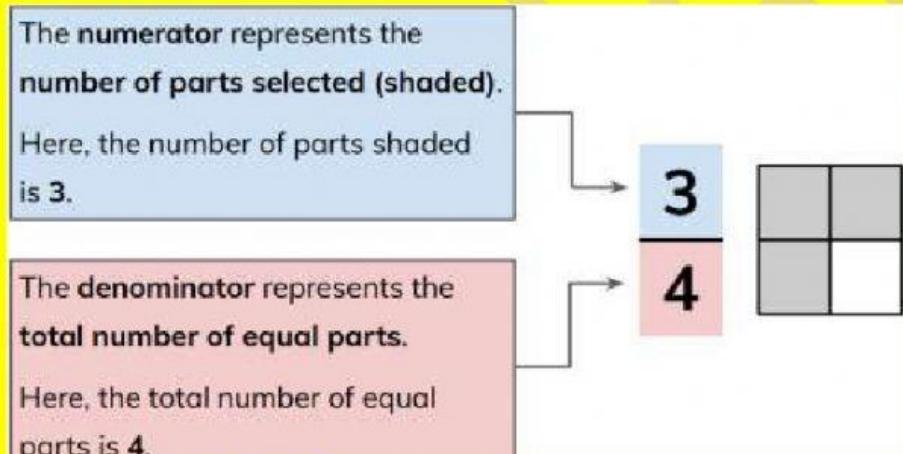

- A fraction is a number that represents a part or portion of a whole.
- A fraction has two parts.

A fraction has two parts: $\frac{3}{4}$

- a number on the top -3
- a number at the bottom -4

The number on the top is called the numerator=3

The number at the bottom is called the denominator=4

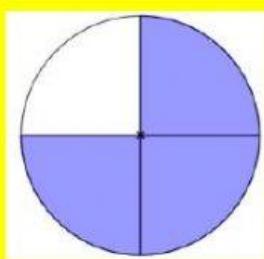

Write numerator and denominator :

$$\frac{2}{4} \quad \text{numerator} = \quad \text{denominator} =$$

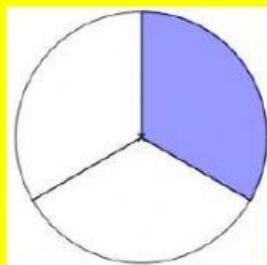

$$\frac{3}{4} \quad \text{numerator} = \quad \text{denominator} =$$

$$\frac{4}{5} \quad \text{numerator} = \quad \text{denominator} =$$

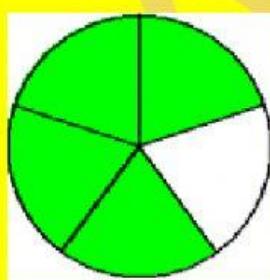

Write in fraction form:

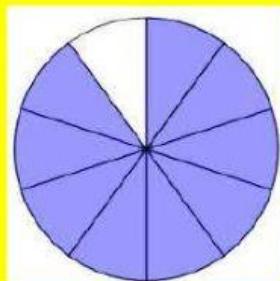

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$

$$\frac{\square}{\square}$$
