

IELTS SPEAKING PART 1

FILMS

1. Do you enjoy watching films?

Oh yes. I'm a bit of a film fanatic actually. I watch films most weekends and quite often during the week as well. I much prefer films to watching TV programs.

2. What kinds of films do you like most?

I really like a wide variety of film general. But if I had to choose a type of film. I'd say I mainly go for suspense, psychological thrillers. In fact some of my favourite films are the old Hitchcock films he really was the master of suspense.

3. Did you watch much TV as a child?

No, I didn't. My parents encouraged us, that's my brothers and me, to spend time outdoors rather than sitting inside watching TV. So we only ever had the chance to watch TV for an hour each evening before we went to bed. I wouldn't say it was very common because most of my friends watched loads of TV.

4. Are foreign language films popular in your country?

No, they're not really that popular compared to domestic films. I mean there are some Asian films from India and China, as well as some films from Europe as well but I think having to read the subtitles puts people off watching them. It's a shame really because I think it's important for people to watch more foreign language films in order to learn more about other cultures.
