

CALCOLA IL VALORE DELLE FRAZIONI INDICATE.

$$\frac{2}{9} \text{ di } 81 \rightarrow 81 : 9 = \underline{\quad} \rightarrow \underline{\quad} \times 2 = \mathbf{18}$$

$$\frac{3}{4} \text{ di } 48 \rightarrow \underline{\quad} : \underline{\quad} = 12 \rightarrow 12 \times \underline{\quad} = \mathbf{36}$$

$$\frac{3}{7} \text{ di } 56 \rightarrow \underline{\quad} : \underline{\quad} = 8 \rightarrow 8 \times \underline{\quad} = \mathbf{24}$$

$$\frac{2}{3} \text{ di } 27 \rightarrow 27 : 3 = 9 \rightarrow 9 \times 2 = \underline{\quad}$$

$$\frac{4}{7} \text{ di } 49 \rightarrow \underline{\quad} : \underline{\quad} = \underline{\quad} \rightarrow \underline{\quad} \times \underline{\quad} = \mathbf{28}$$

$$\frac{1}{2} \text{ di } 36 \rightarrow 36 : \underline{\quad} = 18 \rightarrow 18 \times \underline{\quad} = \underline{\quad}$$

$$\frac{3}{6} \text{ di } 42 \rightarrow \underline{\quad} : \underline{\quad} = \underline{\quad} \rightarrow \underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\frac{5}{9} \text{ di } 18 \rightarrow \underline{\quad} : \underline{\quad} = \underline{\quad} \rightarrow \underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\frac{4}{5} \text{ di } 45 \rightarrow \underline{\quad} : \underline{\quad} = \underline{\quad} \rightarrow \underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\frac{7}{9} \text{ di } 54 \rightarrow \underline{\quad} : \underline{\quad} = \underline{\quad} \rightarrow \underline{\quad} \times \underline{\quad} = \underline{\quad}$$
