

Character Traits

A **trait** is a quality or part of you that **lasts** for a long time. For example, you are almost always honest. Honesty is a trait of yours. However, yesterday you were happy. Today you seem sad. Your feelings are not usually character traits, because they change from day-to-day, even hour-to-hour.

Character traits are words that describe the "**inside**" of you. They tell what **type** of person you are.

Put an "X" next to each character trait that describes you.
