TOPIC: WHAT IS THE DIGITAL WORLD?

The internet is the starting point of a digital revolution. One of the most relevant changes in this era is communication. People used to make phone calls. Now, thanks to smartphones and the internet, communication is faster and easier. In fact, video calls are now part of everyday communication.

This digital world has also influenced education. Teachers have developed many tools, and designed websites and virtual classes to make the learning process more effective. For example, video conferences are perfect for keeping in touch with students who can't attend face-to-face classes.

Nowadays, social networks help support businesses to buy and sell products, and even keep in touch with customers in a more personalized way.

There are a lot of benefits in this digital world. However, there are also some dangers if a person doesn't use the internet safely. Everyone has to be careful online because the internet can be dangerous in many ways.

2. Drag and drop

careful dangers effective easier internet
