Answer these questions about the text.

- 1- When and where was she born?
- 2- What was her job?
- 3- Did she win a Nobel Prize?
- 4- What did she discover?
- 5- When did she die?

MARIE SKLODOWSKA

was born in 1867, in Poland. She married Professor Pierre Curie, who was a Frenchman. So Marie Curie was Polish and French. She lived and worked

in Paris. She was a great scientist. She discovered the chemical element, radium, and she helped to discover X-rays. She was a Nobel Prize winner twice: in 1903, for physics and, in 1911, for chemistry. She died in 1934.
