

You are a trainee pit-stop mechanic. A trainer is giving you instructions. Listen and write numbers 1–10 to show the correct order of instructions.

Tighten the wheel nuts.		Adjust the air pressure in the tyre.	
Raise the car with the jack.		Bring the new wheel out.	
Loosen the wheel nuts.		Put the new wheel on.	
Take the old wheel off.		Put the jack under the car.	
Take the old wheel away.		Lower the car and take the jack away.
