

AP Biology Topic 1.6 – Nucleic Acids video notes

1. DNA = two antiparallel \_\_\_\_\_

2. Nitrogenous bases \_\_\_\_\_

3. What does it mean when they say DNA is antiparallel? \_\_\_\_\_

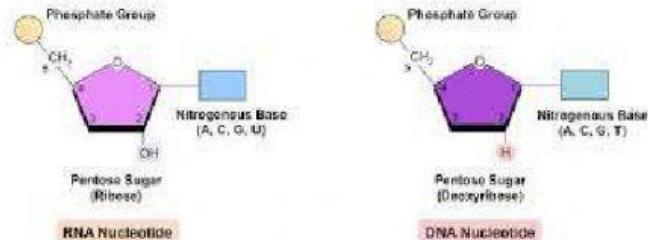

4. What type of bonds do ATGC make with each other across the ladder? \_\_\_\_\_

Created By: Chivas & Jordan Spivey

5.

DNA	RNA

6.

- DNA has a \_\_\_\_\_
  - o No -OH \_\_\_\_\_
- RNA has a \_\_\_\_\_
  - o Has an \_\_\_\_\_
- What are some differences you see between the structures of DNA and RNA? \_\_\_\_\_

7. How do DNA and RNA work together to make proteins? \_\_\_\_\_

8. How are complimentary strands made? \_\_\_\_\_
