Taking the medical interview.

Relate the description of the current complaint, with the feature in order to make a diagnosis:

Good Evening Doctor Masrallah…

I've come today because of a dull pain, which started 5 days ago, here, in the back, without any warning. At first it was only on occasions, but since yesterday, I can feel it getting worse whenever I get up from bed, as well as with pressure on the site. Sometimes it feels as if it moves from my back, to my left side. I tried to take some aspirin, but it didn't get any better. I've never felt it before, but today, I can feel it all the time, as a constant heaviness.
