IV. READING

Read the passage and then decide whether the sentences are True (A) or False (B)

Smart cars

One way to solve transportation problems in major cities is to make the cars much smaller and smarter. So-called "smart cars" have been around for many years. But there are signs of progress. Many automakers, including BMW and Nissan already offer compact electric cars. The BMW i3, already available in Europe, can brake automatically when your foot off the accelerator, consumes no gasoline and operates for 80-100 miles per charge.

"I do believe that there is a growing opportunity for new types of vehicles specifically designed for urban areas" Koslowski said, adding that these cars need more a "wow" factor and will have to become part of an urban area's overall plan for better transportation in a city, not just showy small cars for individual drivers.

Read the following passage and choose the option (A, B, C or D) that best answers each of the questions below.

Hanoi's Transport Plan

Hanoi's Transport Plan aims to increase the share of public transport from the current low figure of 9% of trips, to above 60% by 2030, by which time Hanoi is slated to have six new metro lines and three Bus Rapid Transit (BRT) lines/ But the ambitions get even steeper. Last month, Hanoi's Party Committee outlined plans to ban motorbikes from the downtown area by 2025, in line with improved public transport. A total downtown ban of the vehicles would require a huge lifestyle shift for most residents – and put an enormous amount of pressure on the new metro system. None of locals I speak to regard the 2025 plan as feasible.
