#### **Most crowded cities in the world**

Two Indian cities – Mumbai and Kota – have been named among the world's most crowded in a list topped by Dhaka, said the World Economic Forum (WEF), citing UN- Habitat data.

With a population density of 44,500 people per square kilometer, Dhaka, the capital of Bangladesh, is the most crowded city on the planet, followed by India's financial capital Mumbai, home to 31,700 people per square kilometer at the second place.

Kota in Rajasthan with 12,100 people per square kilometer was ranked seventh. More than half of the world's population currently lives in urban areas and the United Nations (UN) expects that proportion to increase to 66 percent by 2050, with close to 90 percent of the increase concentrated in Asia and Africa.

## Biomass energy and technology

Biomass is a type of material from living organisms that mainly referring to plants or plant-derived material. it could convert to other types of energy through combustion, chemical reaction or biochemical conversion which makes biomass energy become a kind of renewable energy. In many ways biomass can be considered as a form of stored solar energy. The energy of the sun is captured through process of photosynthesis in growing plants.

Biomass technology might have impact on the environment when the main methodology is combustion which would emit a large amount of Carbon dioxide to the atmosphere. Furthermore, it also has an impact on the land conservation.
