

LESSON 1: Sources of Food

Food is anything that people or animals eat, drink, or take. This gives them energy, helps them grow, and keeps them alive.

Food comes from

plants and animals. **Fruits** and **vegetables** are examples of foods that come from **plants.**

Can you name some fruits and vegetables that you eat at home?

Rice, bread, cereal, and pasta also come from plants. These are called **grains and grain products**.

What is your favorite pasta or cereal?

Meat and eggs are examples of foods that come from animals. Fish, chicken, beef, and pork all come from animals.

Animals also give you milk, Foods made from milk are **dairy products**. Examples of dairy products are butter, cheese, yogurt, and ice cream. As a growing child, you never outgrow your need for milk.

A. Write **P** on the line if the food comes from plants. Write **A** if it comes from animals.

- | | | | |
|-------|------------|-------|--------------|
| _____ | 1. peanut | _____ | 6. spaghetti |
| _____ | 2. egg | _____ | 7. lechon |
| _____ | 3. oatmeal | _____ | 8. celery |
| _____ | 4. tomato | _____ | 9. cheese |
| _____ | 5. rice | _____ | 10. squid |
