Base ten blocks representing the addition of 83 and 67. The first number is composed of one ten rod and three one units. The second number is composed of one ten rod and seven one units. A red line connects the three one units of the first number to the seven one units of the second number, indicating a regrouping process. The result is shown in three empty boxes: two tens rods and one one unit.

Base ten blocks representing the addition of 83 and 67. The first number is composed of one ten rod and three one units. The second number is composed of one ten rod and seven one units. A red line connects the three one units of the first number to the seven one units of the second number, indicating a regrouping process. The result is shown in three empty boxes: two tens rods and one one unit.

Base ten blocks representing the addition of 58 and 52. The first number is composed of one ten rod and eight one units. The second number is composed of one ten rod and two one units. A red line connects the eight one units of the first number to the two one units of the second number, indicating a regrouping process. The result is shown in three empty boxes: two tens rods and one one unit.

Base ten blocks representing the addition of 58 and 52. The first number is composed of one ten rod and eight one units. The second number is composed of one ten rod and two one units. EJERCICIO 19.

Base ten blocks representing the addition of 33 and 77. The first number is composed of three green tens rods and three pink ones units. The second number is composed of seven green tens rods and seven pink ones units. The sum is shown as one green hundred rod, one green ten rod, and zero pink ones units. Red lines indicate the regrouping process: ten ones units from the second number are grouped into a new green ten rod, which is then added to the three existing tens rods to form the final hundred and ten rods.

Base ten blocks representing the addition of 33 and 77. The first number is composed of three green tens rods and three pink ones units. The second number is composed of seven green tens rods and seven pink ones units. The sum is shown as one green hundred rod, one green ten rod, and zero pink ones units. A green circle is placed above the first number, and a red line connects it to the first ten rod of the second number, indicating a regrouping step.

EJERCICIO 20.

Base ten blocks representing the addition of 68 and 93. The first number is composed of six green tens rods and eight pink ones units. The second number is composed of nine green tens rods and three pink ones units. The sum is shown as one green hundred rod, six green ten rods, and one pink ones unit. Red lines indicate the regrouping process: ten ones units from the first number are grouped into a new green ten rod, which is then added to the six existing tens rods to form the final hundred and six tens rods.

Base ten blocks representing the addition of 68 and 93. The first number is composed of six green tens rods and eight pink ones units. The second number is composed of nine green tens rods and three pink ones units. The sum is shown as one green hundred rod, six green ten rods, and one pink ones unit. A green circle is placed above the first number, and a red line connects it to the first ten rod of the second number, indicating a regrouping step.

EJERCICIO 21.

Base ten blocks representing the addition of 49 and 85. The first number is composed of four green tens rods and nine pink ones units. The second number is composed of eight green tens rods and five pink ones units. The sum is shown as one green hundred rod, three green ten rods, and four pink ones units. Red lines indicate the regrouping process: ten ones units from the first number are grouped into a new green ten rod, which is then added to the four existing tens rods to form the final hundred and three tens rods.

Base ten blocks representing the addition of 49 and 85. The first number is composed of four green tens rods and nine pink ones units. The second number is composed of eight green tens rods and five pink ones units. The sum is shown as one green hundred rod, three green ten rods, and four pink ones units. A green circle is placed above the first number, and a red line connects it to the first ten rod of the second number, indicating a regrouping step.
