Learning Objective	Steps to Success
To answer questions about Vulture Culture.	<ol style="list-style-type: none"> 1. Read the text. 2. Circle the question words. 3. Answer the questions.

Vulture Culture

Read the text.

There are about 20 kinds of vulture. Most vultures live in hills and mountains. Most of them have a bald head and neck. They can stay clean when eating. They usually feed on dead or injured animals. Their feathers are different from the other birds.

This is a picture of an Andean condor. It is amazing to see this vulture flying. Here are some facts about Andean condors.

Where do Andean condors live?

Andean condors live in South America. They can glide many kilometres looking for food.

Answer the questions.
