

Name: _____ Year: _____ Date: _____

Answer the following questions:

1. Evaluate: $54\,287 + 22\,974$ =	7. Express 7m 34cm in <u>centimeters</u> . = <i>centimetres</i>
2. Evaluate : $94\,027 - 12\,344$ =	8. Fill in the space below: _____ + 74 = 217
3. Evaluate: 374×14 =	9. Simplify $\frac{2}{5} + \frac{3}{10}$ = —
4. Calculate $3346 \div 7$ =	10. Add the following and give your answer in metres: <i>3m, 7m, 45cm, 5m, 70cm</i> =
5 Simplify: <i>7kg 744g + 4kg 272g</i> = <i>kg</i> <i>g</i>	11. Write in <u>numerals</u> : <i>Twelve hundred thousand and four.</i> =
6. Express 7.25 as a <u>fraction in its simplest form</u> = —	12. Write $\frac{34}{5}$ as a <u>mixed number</u> . = —
