

Name _____

Date _____

Sequences (A)

① Complete the table.

x	1	2	3	4	5	6
y	3	6	9			

a) Describe the pattern in the table.

b) What would the 9th term in the pattern be?

② Complete the table.

x	1	2	3	4	5	6
y	5	10	15			

a) Describe the pattern in the table.

b) What would the 8th term in the pattern be?

③ Apply the rule to complete the number patterns.

a) Rule:  $\times 2 =$

	1	2	3	4	5	6	7	8

b) Rule:  $+ 5 \times 2 =$

	1	3	5	7	9	11	13	15

c) Rule:  $\times 10 - 6 =$

	1	3	5	7	9	11	13	15

Name _____

Date _____

Sequences (B)

① Complete the table.

x	1	2	3	4	5	6
y	7	14	21			

a) Describe the pattern in the table.

b) What would the 10th term in the pattern be?

② Complete the table.

x	10	20	30	40	50	60
y	19			79		119

a) Describe the pattern in the table.

b) What would the 100th term in the pattern be?

③ Apply the rule to complete the number patterns.

a) Rule: $\bigcirc \times 10 \div 2 = \square$

$\bigcirc$	1	2	3	4	5	6	7	8
$\square$								

b) Rule: $4 \times \bigcirc + 5 \times 2 = \square$

$\bigcirc$	2	4	6	8	10	12	14	16
$\square$								

c) Make your own rule and use it to fill in the table.
