Find the missing numbers and **write** the answers below the dingo pups.

The **answer** on **both sides** of the **equals sign needs to be the same.**
For example:
100 + 50 = 20 + 130
150 = 150.

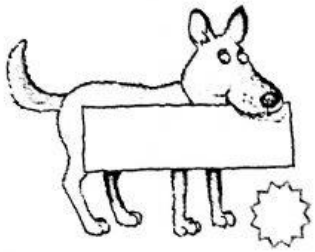
9. 46 + 29 = 50 + 
10. 245 +  = 483 + 117

11. 561 + 113 = 259 + 
12. 783 + 115 =  + 469

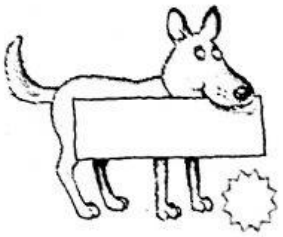
Find the starting numbers and **write** on the dingoes. **What is** the starting number if I:

The **starting number** can be found by **working backwards**, i.e. **starting** with the **answer** and **using** the **inverse** (or **'opposite'**) **operation** to **find** the starting number.

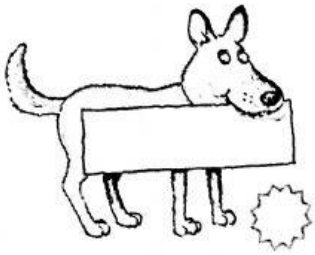
13. subtract 28 and add 147 to give 226?



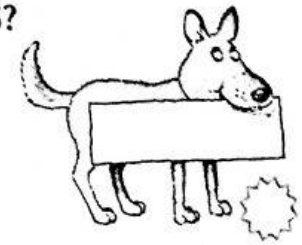
14. subtract 147 and add 635 to give 1176?

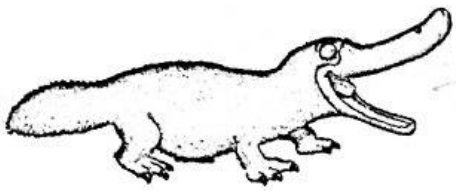


15. add 2479 and subtract 108 to give 7856?



16. add 4725 and subtract 3610 to give 13 425?





How did you go? Turn to the back of the book to record your score.
