

1. The Identity Property of Zero means- the sum of zero and any number is the other number.

$$999 + \underline{\hspace{1cm}} = 999$$

$$\underline{\hspace{1cm}} + 0 = 999$$

$$0 + \underline{\hspace{1cm}} = 40$$

$$40 + \underline{\hspace{1cm}} = 40$$

2. Round the following numbers to the nearest 10 and 100

	10	100
61		
521		
6,245		

3. Solve for the missing addend.

$$\underline{\hspace{1cm}} + 48 = 60$$

$$25 + \underline{\hspace{1cm}} = 50$$

$$820 + \underline{\hspace{1cm}} = 840$$

4. You can group addends different ways, and the sum will not change. Addends are grouped with parenthesis. (You add the part in parenthesis first.)

$$(12 + 5) + 6 = 12 + (5 + \underline{\hspace{1cm}})$$

$$9 + (10 + 5) = (9 + 10) + 5$$

$$(11 + 8) + 99 = 11 + (\underline{\hspace{1cm}} + 99)$$
