# MODERN MEDICINE PRESENTS A PROBLEM

Until the 20th century, most doctors were general **(1)** _____ [PRACTICE]. Of those who specialised, the **(2)** _____ [MAJOR] were **(3)** _____ [SURGERY] not regarded with much respect in many countries. Experts in other fields were found **(4)** _____ [PRIMARY] on the staff of medical schools. Progress in science brought about fundamental changes to this **(5)** _____ [SITUATE]. Modern science has made **(6)** _____ [PREVIOUS] unimaginable **(7)** _____ [DEVELOP] possible. These include the **(8)** _____ [PRODUCE] of standardised drugs, the **(9)** _____ [ANALYSE] of the **(10)** _____ [CONSTITUTE] of blood and body tissues, and the use of X-rays. The **(11)** _____ [INTRODUCE] of these and other **(12)** _____ [REVOLUTION] techniques and practices led to a **(13)** _____ [REQUIRE] for sophisticated facilities, staffed by highly-trained doctors and **(14)** _____ [ASSIST]. This has **(15)** _____ [PLAIN] been **(16)** _____ [BENEFIT]. However, as **(17)** _____ [TREAT] multiply and life **(18)** _____ [EXPECT] rises, financing these **(19)** _____ [INCREASE] expensive facilities has become **(20)** _____ [PROBLEM] for governments worldwide.
