## MODERN MEDICINE PRESENTS A PROBLEM

Until the 20<sup>th</sup> century, most doctors were general (1) \_\_\_\_\_ [PRACTICE]. Of those who specialised, the (2) \_\_\_\_\_ [MAJOR] were (3) \_\_\_\_\_ [SURGERY] not regarded with much respect in many countries. Experts in other fields were found (4) \_\_\_\_\_ [PRIMARY] on the staff of medical schools. Progress in science brought about fundamental changes to this (5) \_\_\_\_\_ [SITUATE]. Modern science has made (6) \_\_\_\_\_ [PREVIOUS] unimaginable (7) \_\_\_\_\_ [DEVELOP] possible. These include the (8) \_\_\_\_\_ [PRODUCE] of standardised drugs, the (9) \_\_\_\_\_ [ANALYSE] of the (10) \_\_\_\_\_ [CONSTITUTE] of blood and body tissues, and the use of X-rays. The (11) \_\_\_\_\_ [INTRODUCE] of these and other (12) \_\_\_\_\_ [REVOLUTION] techniques and practices led to a (13) \_\_\_\_\_ [REQUIRE] for sophisticated facilities, staffed by highly-trained doctors and (14) \_\_\_\_\_ [ASSIST]. This has (15) \_\_\_\_\_ [PLAIN] been (16) \_\_\_\_\_ [BENEFIT]. However, as (17) \_\_\_\_\_ [TREAT] multiply and life (18) \_\_\_\_\_ [EXPECT] rises, financing these (19) \_\_\_\_\_ [INCREASE] expensive facilities has become (20) \_\_\_\_\_ [PROBLEM] for governments worldwide.
