1 Lengkapkan ruang tentang struktur suatu atom neutral. TP1
Complete the space about the structure of a neutral atom.

Positif *Positively*	Neutron *Neutron*	Elektron *Electron*	Proton *Proton*	Negatif *Negatively*

Video

(a) _____ (Zarah yang bercas _____ *charged particle)*

Bilangan elektron = bilangan proton
Number of electrons = number of protons

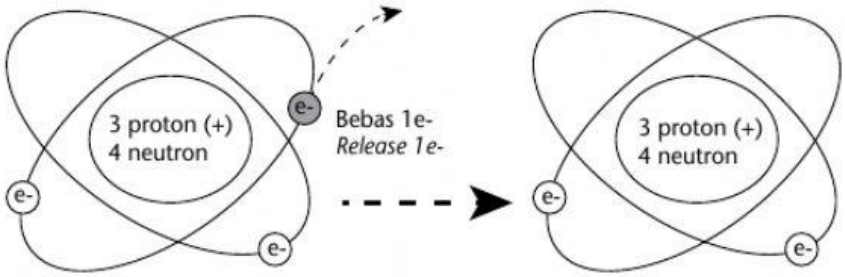

(b) _____ (Zarah yang bercas _____ *charged particle)*

(c) _____ (Zarah yang tidak bercas.
Particle with no charge)

Nukleus *Nucleus*

2 Lengkapkan ruang tentang pembentukan ion positif (kation). TP2
Complete the spaces about the formation of positively charged ion (cation).

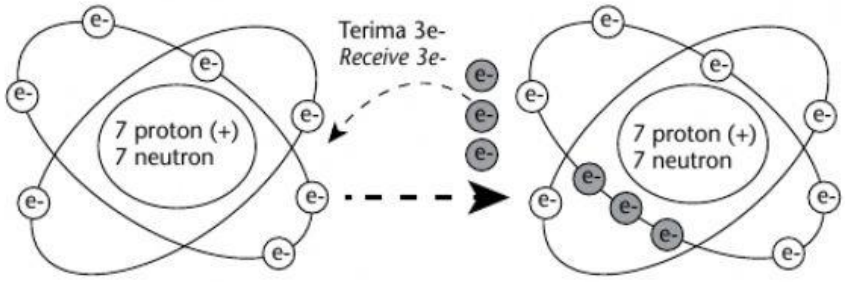

Atom neutral, 3p (+) = 3e (–)
Neutral atom

Cas bagi 3 proton = ☐
Charge of 3 protons
Cas bagi 2 elektron = ☐
Charge of 2 electrons
Jumlah cas = ☐
Total charge

- Lebihan _____ cas positif menyebabkan _____ _____ terbentuk.
  Excess of _____ positive charge causes a _____ _____ to form.

3 Lengkapkan ruang tentang pembentukan ion negatif (anion). TP2
Complete the spaces about the formation of negatively charged ion (anion).

Atom neutral, 7p (+) = 7e (–)
Neutral atom

Praktis Kendiri

Cas bagi 7 proton = ☐
Charge of 7 protons
Cas bagi 10 elektron = ☐
Charge of 10 electrons
Jumlah cas = ☐
Total charge

- Lebihan _____ cas negatif menyebabkan _____ _____ terbentuk.
  Excess of _____ negative charges causes a _____ _____ to form.
