

## PARTS OF A PLANT

Can you remember the parts of a plant?

*stem seed leaf flower roots fruit vegetable*

All plants grow from a \_\_\_\_\_. The \_\_\_\_\_ hold the plant into the soil and absorb water and nutrients.

The \_\_\_\_\_ helps the plant to stand up. It also moves water and nutrients to all the parts of the plant.

The \_\_\_\_\_ absorbs sunlight. The plant uses sunlight to change nutrients into food.

The \_\_\_\_\_ makes more seeds so that the plant can reproduce. Sometimes it grows a \_\_\_\_\_ or \_\_\_\_\_.
