

# 9 MATTER AROUND US

## CHOOSE THE BEST ANSWER

1. The metal which is in liquid state is \_\_\_\_\_  
(a) Carbon                      (b) Mercury                      (c) Copper
2. Ozone (O<sub>3</sub>) contains \_\_\_\_\_ number of oxygen atoms  
(a) 1                              (b) 3                              (c) 2
3. The property which allows metals to be hammered into thin sheets is \_\_\_\_\_  
(a) Ductility                      (b) Malleability                      (c) Lustrous
4. The symbol of carbon is \_\_\_\_\_  
(a) N                              (b) Ca                              (c) C
5. \_\_\_\_\_ is a liquid metal which is used in thermometers.  
(a) Aluminium                      (b) Mercury                      (c) Phosphorus
6. Water contains \_\_\_\_\_ and \_\_\_\_\_ element.  
(a) H and O                      (b) Na and Cl                      (c) C and O
7. \_\_\_\_\_ have high melting point  
(a) Metalloid                      (b) Non-metal                      (c) Metal
8. Every matter exists in \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_ state.  
(a) Solid,Liquid,Gas                      (b) Solution,Colloid,Suspension
9. The symbol of aluminium is \_\_\_\_\_  
(a) A                              (b) Al                              (c) Au
10. \_\_\_\_\_ is the chemical name of common salt  
(a) Sodium Carbonate                      (b) Sodium Chloride                      (c) Sodium Sulphate
