

9 MATTER AROUND US

CHOOSE THE BEST ANSWER

1. The metal which is in liquid state is _____
(a) Carbon (b) Mercury (c) Copper
2. Ozone (O₃) contains _____ number of oxygen atoms
(a) 1 (b) 3 (c) 2
3. The property which allows metals to be hammered into thin sheets is _____
(a) Ductility (b) Malleability (c) Lustrous
4. The symbol of carbon is _____
(a) N (b) Ca (c) C
5. _____ is a liquid metal which is used in thermometers.
(a) Aluminium (b) Mercury (c) Phosphorus
6. Water contains _____ and _____ element.
(a) H and O (b) Na and Cl (c) C and O
7. _____ have high melting point
(a) Metalloid (b) Non-metal (c) Metal
8. Every matter exists in _____, _____ and _____ state.
(a) Solid, Liquid, Gas (b) Solution, Colloid, Suspension
9. The symbol of aluminium is _____
(a) A (b) Al (c) Au
10. _____ is the chemical name of common salt
(a) Sodium Carbonate (b) Sodium Chloride (c) Sodium Sulphate
