Science – Lesson 3: Vectors and the Life Cycle of Insects

Date: \_\_\_\_\_

Answer the following questions below.

1. Define the term life cycle.

---

---

2. Name the three stages of the life cycle of the cockroach.

---

3. What is the meaning of metamorphosis?

---

---

4. Write **complete** or **incomplete** in the spaces provided to tell what type of life cycle the following animals go through.

INSECT	LIFE CYCLE
Moth	
Termite	
Fly	

5. Use the numbers 1, 2, 3, and 4 to order the stages of a complete life cycle.

- a. \_\_\_\_ pupa  
b. \_\_\_\_ adult  
c. \_\_\_\_ egg  
d. \_\_\_\_ larva

6. What are vectors? Give one example of a vector that is not an insect.

---

---

7. Explain the difference between the life cycle of a mosquito and the life cycle of a cockroach.

---

---

---

---

8. The insect below goes through an incomplete life cycle. Label the stages in order of this cycle.

- a. \_\_\_\_\_
- b. \_\_\_\_\_
- c. \_\_\_\_\_
