2021학년도 1학년 영어수업 자료 #2

CLASS:___ NUM:____ NAME: _____

9. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

In school, students _____ learn to view _____ among scientists _____ a natural part of the progress of science; most textbooks are written _____ science is a set of truths to be memorized. Teachers, especially in America, are under _____ _____ to cover a large number of unrelated science topics each year to prepare their students for accountability tests, which generally _____ students' ability to recall facts. When _____ is emphasized over _____ , there simply is not time to discuss how the scientific ideas came to be. There is _____ time to help students _____ the meaning of the ideas themselves. On the _____ occasions when students are exposed to historical ideas about science, those ideas _____ be dismissed with minimal discussion of why they were replaced, or why scientists held them in the first place. Students are _____ with the impression that scientists held some silly ideas in the past, but now they have them all figured out, and today's scientific theories are true.
