WEEK 4

SEPTEMBER 23, 2021.

TOPIC 10 PERIOD OF TIME

The concept of time is self-evident. An hour consists of a certain number of minutes, a day of hours and a year of days.

Clocks measure time using hours and minutes. **Hour** is a unit of time and is equal to 60 minutes. There are 24 hours in a day, separated into two sets of 12 hours, one set for a.m. and one set for p.m. On a clock, the hour is the **short hand**.

Measuring Time

Decade = 10 Years
Score = 20 Years
Century = 100 Years
Millennium = 1,000 Years

How Often ?

Annual = Every year
Biannual = Twice a year
Semiannual = Every 6 months
Centennial = Every 100 years
