

# Rounding Off Decimals To The Nearest Whole Number

## Steps to Success:

1. Underline the whole number
2. Circle the tenths
3. If tenths is 5 or more, add 1 to whole
4. If tenths is 4 or less, whole number stay

## Example

$23.\underline{5}0 \approx 24$  (with  $+1$  above the 5 and 2 circled)

$78.\underline{4}9 \approx 78$  (with 3 circled above the 78)

1) Round off the given decimal numbers to the nearest whole number:

### Note:

- Fill in the  to show rounding up in whole number.

$2.7 \approx \boxed{3}$

- Let the  empty if there is no rounding up in tenths

$1.34 \approx \boxed{1}$

a)  $1.28 \approx$  \_\_\_\_\_ b)  $3.48 \approx$  \_\_\_\_\_ c)  $6.92 \approx$  \_\_\_\_\_

d)  $5.66 \approx$  \_\_\_\_\_ e)  $12.74 \approx$  \_\_\_\_\_ f)  $25.89 \approx$  \_\_\_\_\_

g)  $6.72 \approx$  \_\_\_\_\_ h)  $73.85 \approx$  \_\_\_\_\_ i)  $0.72 \approx$  \_\_\_\_\_

j)  $20.58 \approx$  \_\_\_\_\_ k)  $0.123 \approx$  \_\_\_\_\_ l)  $4.79 \approx$  \_\_\_\_\_

2)

Draw an arrow to match each number to its nearest whole.

3.6	<table border="1"><tr><td>1</td></tr><tr><td>2</td></tr><tr><td>3</td></tr><tr><td>4</td></tr><tr><td>5</td></tr><tr><td>6</td></tr><tr><td>7</td></tr><tr><td>8</td></tr><tr><td>9</td></tr></table>	1	2	3	4	5	6	7	8	9	0.6
1											
2											
3											
4											
5											
6											
7											
8											
9											
2.4	5.5										
4.8	3.29										
9.17	6.55										
7.5											

**HOW DO YOU FEEL ABOUT TODAY'S LESSON?**

Type in YOUR NAME in the box provided under the options below.

 I understand and I can do it on my own	 I do not really understand and I need more practice.	 I really need help
