

## Exponents Practice

**Exponents = Repeated Multiplication**

You multiply the base (large number) by itself as many times as the exponent (small number above base) tells you to.

**3** ← Exponent

**5** ← Base

$$5 \times 5 \times 5 = 125$$

1.  $2^8$
2.  $3^3$
3.  $4^0$
4.  $1^{10}$
5.  $5^4$
6.  $11^4$
7.  $8^2$
8.  $10^6$
9.  $6^5$
10.  $7^3$
