## **Exponents Practice**

## Exponents = Repeated Multiplication

You multiply the base (large number) by itself as many times as the exponent (small number above base) tells you to.

 $3 \leftarrow Exponent$ 

$$5 \leftarrow_{\mathsf{Base}}$$

$$5 \times 5 \times 5 = 125$$

- 1. 2<sup>8</sup>
- **2**. 3<sup>3</sup>
- **3**. 4<sup>0</sup>
- **4**. 1<sup>10</sup>
- **5**. 5<sup>4</sup>
- **6**. 11<sup>4</sup>
- **7**. 8<sup>2</sup>
- **8**. 10<sup>6</sup>
- **9**. 6<sup>5</sup>
- **10**. 7<sup>3</sup>
